

Invite friends via Social Media

We prepared two videos you may use to advertise for the Linux-Presentation-Day in Social Media.

Feel free to share this page or video already in the Linux community.

From october 15th the first videos will be online at l-p-d.org. Viral advertisement might be most effective after that.

There are two options:

1. Download the video and upload it by yourself in Social Media
2. Share an already created Post
